Toilet Cubicles Classic Design

SCHILLER offers a range of high quality Toilet Cubicles which feature a non-ferrous metal framework and waterproof panelling and doors. The system therefore, is ideally suited to areas of high humidity and constant use. It is extremely rugged while at the same time eye catching owing to its unique design. It does not employ the traditional "pilaster" approach thus allowing wide access to each cubicle. Every order is made against individual specifications to fit exactly into the space allocated and is supplied in a kit form ready for immediate installation.

Vanity Units Classic Design

The Classic Style Vanity Unit has been designed to complement the Classic Design Toilet and Shower Cubicles. Each unit is made to measure and is supplied in a kit form, complete with assembly and installation instructions. The structure of this vanity unit is a painted stainless steel frame which connects to tubular legs. The countertop is secured to this frame and the access panels are secured by threaded bolts to the legs. The unit is designed to be extremely robust, yet at the same time aesthetically pleasing. All the metal components are from stainless steel and all the panel and countertop elements are from 12mm thick waterproof compact laminate. The prices in the table do not include basins or mixer taps; see next page for further details.

Code	Width	No. Basins	Price
S60VL	600mm	1	€1000.00
S120VL	1200mm	2	€1600.00
S180VL	1800mm	3	€2400.00
S240VL	2400mm	4	€3200.00

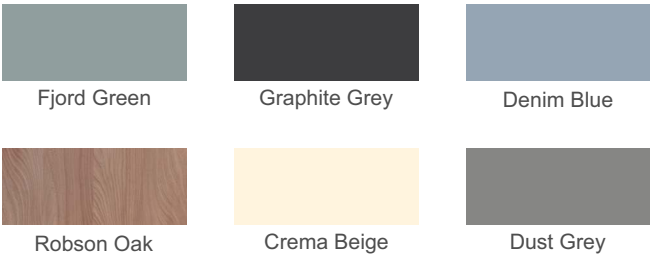

Illustrated is an 1800mm wide unit incorporating three ceramic inset basins with monobloc electronically operated mixer taps.

Note! Vanity unit prices do not include prices for basins and taps.

Toilet Cubicles ALU Design

SCHILLER ALU offers a range of high quality yet economical Toilet Cubicles which feature an aluminium framework with MFC panelling and doors. The system therefore, is not ideally suited to areas of high humidity and constant use. It is extremely rugged while at the same time eye catching owing to its unique design. It employs the traditional "pilaster" approach. Every order is made against individual specifications to fit exactly into the space allocated and is supplied in a kit form ready for immediate installation. Full installation instructions are included with each kit.

The Layout Configurations

Vanity Units ALU Design - MFC

The ALU MFC Style Vanity Unit has been designed to complement the ALU Design Toilet Cubicles. Each unit is made to measure and is supplied in assembled form. The structure of this vanity unit is a melamine faced chipboard (MFC) carcass. The countertop is secured to the carcass and the access panels are secured by "lift off" clips. No tools are required to remove the panels - they simply lift up and off. The unit is designed to be reasonably robust, yet at the same time aesthetically pleasing. The plinth is clad in a brushed finish stainless steel. The countertop is made from 12mm thick waterproof compact laminate. The prices in the table do not include basins or mixer taps; see next page for further details.

Code	Width	No. Basins	Price
S60VAMFC	600mm	1	€600.00
S120VAMFC	1200mm	2	€1000.00
S180VAMFC	1800mm	3	€1500.00
S240VAMFC	2400mm	4	€2000.00
S300VAMFC	3000mm	5	€2500.00

Note!
Vanity unit prices do not include prices for basins and taps.

ALU Design - MFC Semi Recessed

The ALU MFC Semi Recessed Style Vanity Unit has been designed to complement the ALU Design Toilet Cubicles. In order to facilitate people that are not very tall, this vanity unit can also be supplied with either or both ends with reduced height.

With MFC Carcass

Code	Width	No. Basins	Price
SR60VAMFC	600mm	1	€600.00
SR120VAMFC	1200mm	2	€1000.00
SR180VAMFC	1800mm	3	€1500.00
SR240VAMFC	2400mm	4	€2000.00
SR300VAMFC	3000mm	5	€2500.00

Integrated Plumbing System - IPS

The Schiller IPS System is manufactured from modular welded steel frames combined with laminated/MFC panelling. Consisting of a base frame and a connected upper frame, it is designed to provide an easily installed and strong framework for duct panelling and associated sanitary ware and fittings. It is particularly suitable as a frame to support wall hung WCs, while also providing a skeleton structure to which Central Connecting Panels are secured. The system has been designed to take into consideration modern building needs and has been developed to accommodate a wide range of sanitary ware options including wall hung WCs, floor standing back to wall WCs and urinals. The system may also be supplied as a plain wall to conceal services.

Each module frame is 500mm wide and is supplied preset and ready for installation on site. The kits include top and bottom skirting and header boards, end panels, central connecting panels, lift off panels and where appropriate, side panels. The Lift off Panels are located and secured with pre-fitted Fixing Clips which attach to the frames and which allow for the use of 18mm melamine faced chipboard and 12mm compact grade laminate. Composite grade laminate is especially suitable for use in wet areas. Each module is available either with or without a pre-fitted concealed cistern.
